☉ Objective

I am an aspiring software engineer and web developer with a passion for front-end development, UI/UX design, and innovative problem-solving. As an undergraduate and freelancer, I am dedicated to leveraging my skills to create impactful and user-friendly web applications. I seek to continue learning and growing in the field while contributing to technological advancements.

☉ Education

- High School: Completed Grades 9-12
- Achieved 1st place in school competitions (Grades 9-12)
- Winner of State Science and Technology Competition
- Winner of State Answering and Questioning Competition

☉ Certifications

- Udacity 5 Million Coder Initiative
- Completed certification under the Udacity initiative for coding and development

☉ Skills

- Programming & Development: HTML, CSS, JavaScript, Front-End Development, Python
- UI/UX Design: Proficient in designing user interfaces and user experiences
- Typing: Expert typist with a speed of 110 WPM
- Language: Fluent in English
- Sports: Hooper (Basketball enthusiast)

☉ Projects

- Learniverse Project: Developed and maintained a platform designed to enhance learning experiences by integrating note-taking, content organization, and user-friendly interfaces.
- Note-Taking Project: Created a web application for efficient note management, featuring customizable note-taking, sub-notes, and content export functionalities.
- Restaurant Project: Developed a website for a restaurant, focusing on a seamless user experience, online menu browsing, and booking functionality.

☉ Achievements

- Science and Technology Competitions: Multiple awards and recognitions in state and cluster-level competitions.
- School Achievements: Consistently placed 1st in school competitions from Grades 9 to 12.

☉ Languages

- English: Fluency
